Download and install the Earth version of the program and installer from:  
<http://sourceforge.net/projects/symsolon/>

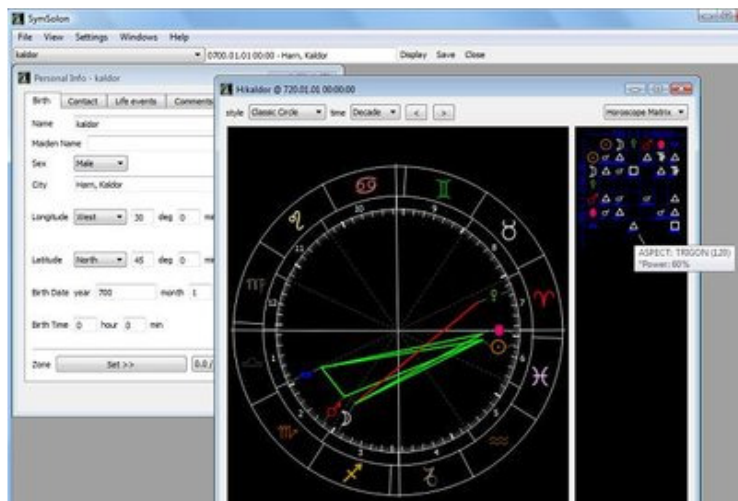

Let me know and I'll send you the files that turn it into a Harnic version.  
(you need the installer so that it sets up the configuration files correctly)

\* Standard Disclaimer from Dilbert:

**Quote:**

Dilbert Zone cartoon, by Scott Adams, Pointy-Haired Boss approaches Tina, the brittle tech writer, and said, "You'll have to have all the documentation written by next week so we can ship it when the software is done." Tina replied, "How can I write instructions for something that doesn't exist yet?" Pointy-Haired Boss answered, "You'll have to make logical guesses."

The last caption of the cartoon shows Tina as she was writing the software documentation, "If you press any key your computer will lock up. If you call our Tech. Support, we'll blame Microsoft."

I'm guessing that the fact that the 2 pictures related to 720TR were viewed 4 times as often as the other is because the Transits of the planets for the year 720 were of interest and use. (At least that makes sense to me.)

Though no one seems to want the program would posting more tansits of the planets for the years 670-730 or so be of interest to anyone?

I thought this might go well as part of a historical text like "An astrological history of King Miginath" or something to provide flavor for someone's campaign.

Quote:

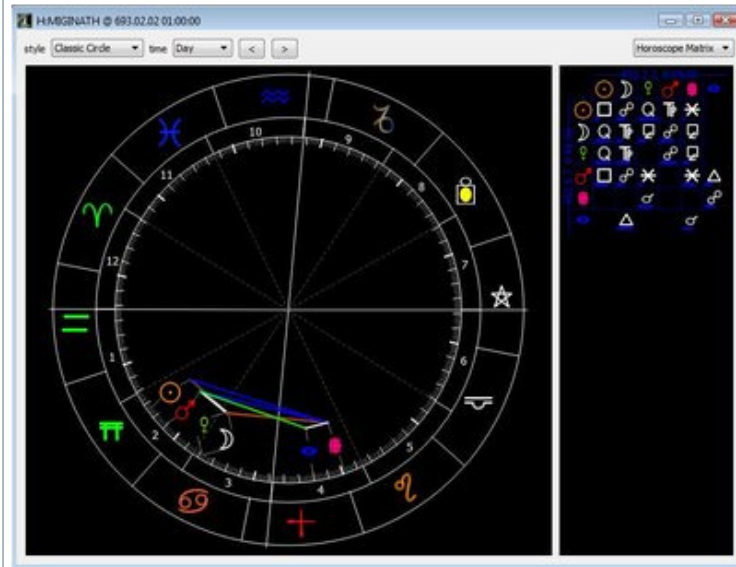

In Larane 692 Kenor, Epeon and Mergus are in a light conjunction to one another in his 6th House. These planets are passing near Angberelius giving 4 planets in fire (and only 1 in water). Astrologically from Miganath's birth Mergus also mirrors these 3 planets from the time of Miganath's birth (Kenor, Epeon and Mergus)

Miginath's father is in failing health. In the Final Months of 692 we see Kenor and Mergus in near conjunction also as Mergus is again mirroring the Kenor of Miginath's birth. The mirroring grows ever stronger up to the new year. Torastra died of old wounds on the last day of Morgat 692.

Miginath is now 40 (nearing 41). The first half of Nuzyael 693 sees a growing conjunction of Alaranal and Epeon which then fades (and Mergus still mirrors Miganath's birth Kenor). In the month of his crowning in Peonu Miganath's horoscope is full of many and confusing signs. But on the 30th (of Peonu) all the planets pass in close

alignment to one another (and in the summer signs) - an auspicious configuration for Miginath's first month as King.
